E-Z Chek® High Range (Potency) Free Chlorine Test Strips

Chlorine strength in bleach solutions will decay over time as a result of aging, light, temperature exposure, etc. RPC's E-Z Chek® **High Range (Potency) Free Chlorine Test Strips** are an accurate, easy, and cost-effective means for validating the potency of diluted bleach solutions used to disinfect water system loops and external surfaces. The Centers for Disease Control (CDC) recommends a level of 500-615 ppm of available chlorine be present in 1:100 diluted bleach (NaOCL) solutions. Be certain there is enough chlorine for safe disinfection of water loops and decontamination of non-porous surfaces by checking the chlorine level in your bleach solutions. It is a simple and fast 90 second "dip and read" test strip with easy to see color changes. This strip features one-step testing for chlorine ppm values of 100, 200, 350, 500, and 750. Use RPC's chlorine potency test strips to be safe and confident that your bleach solutions are the correct strength and your patients are protected.

- ◆ **Fast 90 sec. "dip and read" test for chlorine in bleach solutions.**
- ◆ **Five color blocks for easy, accurate testing of chlorine potency levels.**
- ◆ **Verify compliance with CDC recommendations for bleach solutions.**

- ◆ **Save money by disinfecting with proper bleach concentrations**
- ◆ **Minimize patient risk for infections by ensuring adequate bleach levels**
- ◆ **Use in conjunction with RPC's residual chlorine test strips (K100-0101B)**

E-Z Chek® High Range (Potency) Free Chlorine Test Strips are supplied in a ready to use form. A Certi-Chek™ certificate of conformance for QC validation is available for each test strip type, by lot number. When using RPC test strips all test strip instructions for use, including storage and handling requirements, must be followed. Labeled product shelf life is valid for unopened containers and for opened containers which are immediately resealed and kept in storage conditions as stated in the instructions for use. RPC test strips provide you with multiple options for measuring and monitoring critical dialysis fluids. RPC test strips help maximize quality in your dialysis program and minimize risk when testing dialysis fluids.
