

RPC Test Strips

Why Should You Use Them Instead of Test Strips from Other Vendors?

RPC Test Strip Features

- ◆ **Certi-Chek™ Field Verification Program... only from RPC!** RPC performs test strip field QC tests, maintains all test records,¹ and includes certificates of conformance with each shipment.
- ◆ RPC's *entire* focus is on dialysis technical products and dialysis educational support for you. We have dialysis experts who provide educational and technical support for the application of test strips.
- ◆ Micro-X® peroxide residual and peracetic acid potency test strips are FDA cleared for use with multiple peracetic acid germicides.²
- ◆ Micro-X® peroxide residual and peracetic acid potency test strips are optimized for maximum performance, stability, and storage life.
- ◆ RPC is the only vendor with a *complete* line of FDA-cleared test strips for use in dialysis applications.

Benefits for You

- ▶ **Save money by eliminating QC supplies and costly surveyor citations for not performing test strip QC.** Save time on education for testing, testing procedures, and records.
- ▶ No worries, fears, or concerns. You can feel safe and confident that RPC will provide the on-going educational and technical support for proper application of a complete line of test strips for dialysis applications.
- ▶ Minimize confusion. Reduce the number of strip models you have to purchase and use.³ Save time and money through simplified purchasing and inventory.
- ▶ Trouble-free operation. RPC's test strips perform consistently, with no discoloration or rinse-out potency test performance issues relating to storage.
- ▶ Save time and money on order processing. True one-stop test strip shopping. CapKeeper® saves time and money by preventing loss of test strips and minimizing potential for strip contamination.
