## E-Z GEL™ Drain Cleaner

### Instructions for Use

#### Indications for Use

**E-Z GEL™ DRAIN CLEANER** is specifically designed for cleaning drains and hard-to-access corners, cracks and crevices. **E-Z GEL™** contains a proprietary blend of concentrated bio-enzymatic actives for degrading the most resistant grease molecules, the long-chain fatty acids.

#### Instructions for Use

1. Complete regular (usually weekly) drain line sanitation protocol. Approximately 24 hours after sanitation protocol has been completed, begin “Start Up” applications as described below. This is important because the microorganisms in E-Z Gel™ may not be compatible with the sanitation agent used, particularly strong chlorine bleaches.
2. If drain is not regularly used, moisten drain by pouring 1-2 gallons of warm water into drain. For all applications, apply product at time of lowest drain use, ideally at end of day after the use of all cleaning and sanitation products has been completed.
3. Add four ounces per day to each drain in area. Apply around edge of drain, attempting to coat sides of floor sink, drain grates and drain. Application is typically best accomplished by spraying E-Z Gel™ onto surfaces of floor sinks, drain grates and into drain until all reachable surfaces are wet. Ensure that a full 4 ounces has been applied. Alternatively, pour E-Z Gel™ into drains using the applicator on quart bottle or use EG-SPR-1 Application Sprayer for best results. Repeat dosage daily for 5-7 days.
4. Apply four ounces per drain once or twice per week in the same manner described under “Start Up” above. For best results, make application approximately 24 hours after regular sanitation protocol has been completed.

### **WARNINGS AND PRECAUTIONS**

#### Storage and Handling

- Do not use the **E-Z GEL™** after the expiration date. The expiration date is the last day of the month printed on the bottle/container. (month-year).
- Wear Personal Protective Equipment (PPE).
- **HARMFUL IF SWALLOWED:** Ingestion may cause abdominal pain, nausea, or vomiting.
- **HARMFUL IF INHALED:** Inhalation may cause irritation to lungs and mucous membranes.
- **CAUSES MODERATE EYE IRRITATION:** Contact with eyes may cause eye irritation.
