## E-Z Foam™ Drain Cleaner

### Instructions for Use

#### Indications for Use

**E-Z FOAM™ DRAIN CLEANER** is specifically designed for cleaning drains and hard-to-access corners, cracks and crevices. **E-Z Foam™** “clings” to drain sides and cracks and crevices. **E-Z Foam™** contains a proprietary blend of concentrated bio-enzymatic actives for degrading the most resistant grease molecules, the long-chain fatty acids.

**E-Z Foam™** must be applied using only the **E-Z Foamer™** Professional Application Foamer from RPC.

#### Instructions for Use

1. Pour tap water into the **E-Z Foamer™** until the water level is at the four (4) liter mark (liter markings are embedded on the foamer).
2. Add **E-Z Foam™** concentrate until the total liquid level in the foamer is at the five (5) liter mark. This is a mixing ratio of 4 liters of tap water plus 1 liter of **E-Z Foam™** (4:1, 5X).  
**Note: For embedded or difficult drain biofilms, use a mixing ratio of 3 liters of tap water plus 2 liters of E-Z Foam™ (3:2, 5X)**
3. Using the foamer wand, carefully and gently stir the **E-Z Foam™** solution to mix it.
4. Put the pumper back into the **E-Z Foamer™** and rotate it to lock it into place.
5. Follow all **E-Z Foamer™** Instructions for Use and then pump the **E-Z Foamer™** to 30 psi.
6. Foam into drain as deep as possible (4 to 6 feet is recommended) and around edge of drain and drain cover. *Sixty (60) seconds of foam at 30 psi is optimal.* If necessary, cover part of drain opening when foaming to force foam down the drain. Apply at time of lowest drain use, and avoid using drain until foam has collapsed.
7. For the first week, apply **E-Z Foam™** once per day (typically at night or end of day's work).
8. Repeat application every 2 weeks as needed to maintain drains.

*Note: A small amount of visible brown/gray sediment at the bottom of the E-Z Foam™ bottle is normal. If sediment is present, gently swirl or shake the bottle to move the sediment back into solution.*

### WARNINGS AND PRECAUTIONS

#### Storage and Handling

- Do not use the **E-Z FOAM™** after the expiration date. The expiration date is the last day of the month printed on the bottle/container. (month-year).
- Do not use other drain cleaning products with **E-Z FOAM™**.
- Wear Personal Protective Equipment (PPE).
- HARMFUL IF SWALLOWED: Ingestion may cause abdominal pain, nausea, or vomiting.
- HARMFUL IF INHALED: Inhalation may cause irritation to lungs and mucous membranes.
- CAUSES MODERATE EYE IRRITATION: Contact with eyes may cause eye irritation.
