E-Z Chek® Blood Leak Test Strips

E-Z Chek® Blood Leak test strips provide a convenient method to identify the presence of blood in dialysate if a dialyzer membrane leak is suspected during the hemodialysis procedure. These test strips assist you in differentiating between an actual leak and a false machine alarm. The increased sensitivity of our test strips provides an extra safety margin protecting your patients against the risks of blood loss. Typical chemical components of the dialysis solutions do not interfere with E-Z Chek® Blood Leak Test Strips, so you can be assured of accurate results.

Features & Benefits:

- *Fast results within 60 seconds*
- *Labeled specifically for dialysis use*
- *Environmentally friendly packaging*
- *Extended 2 year shelf life*
- *FDA 510(k) cleared*
- *Backed by RPC's Certi-Chek™ program*
